

METAL  **WORLD**®

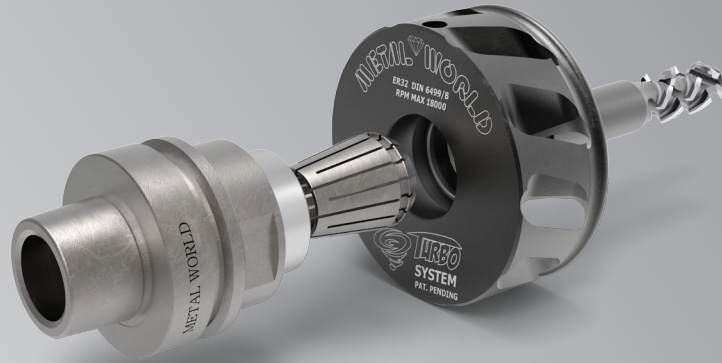

Professional tools all over the world

The double blast turbine

- **TURBO SYSTEM** generates an air-compressed blast, which removes the residue amount of material from inside of any groove.
- **TURBO SYSTEM** generates a vacuum which removes 97% of chips and dust.
- **TURBO SYSTEM** is easy to use, removed and reinstalled as a classic ring nut.

- **TURBO SYSTEM** is suitable for Nesting, Contouring and Profiling.
- **TURBO SYSTEM** has good performances even at low rpm: from 13,000 up to 24,000 RPM.
- **TURBO SYSTEM** works on: chipboard, coated chipboard, MDF, corian, plaster, OSB, fiberglass, carbon fiber, HPL, plastic materials in general even Aluminium Alloys.

- **TURBO SYSTEM** is designed to obtain a low noise emissions, lower than acoustic emissions level of spindles.

- **TURBO SYSTEM** can be placed starting from 3mm up to 25 mm distance over the working panel.

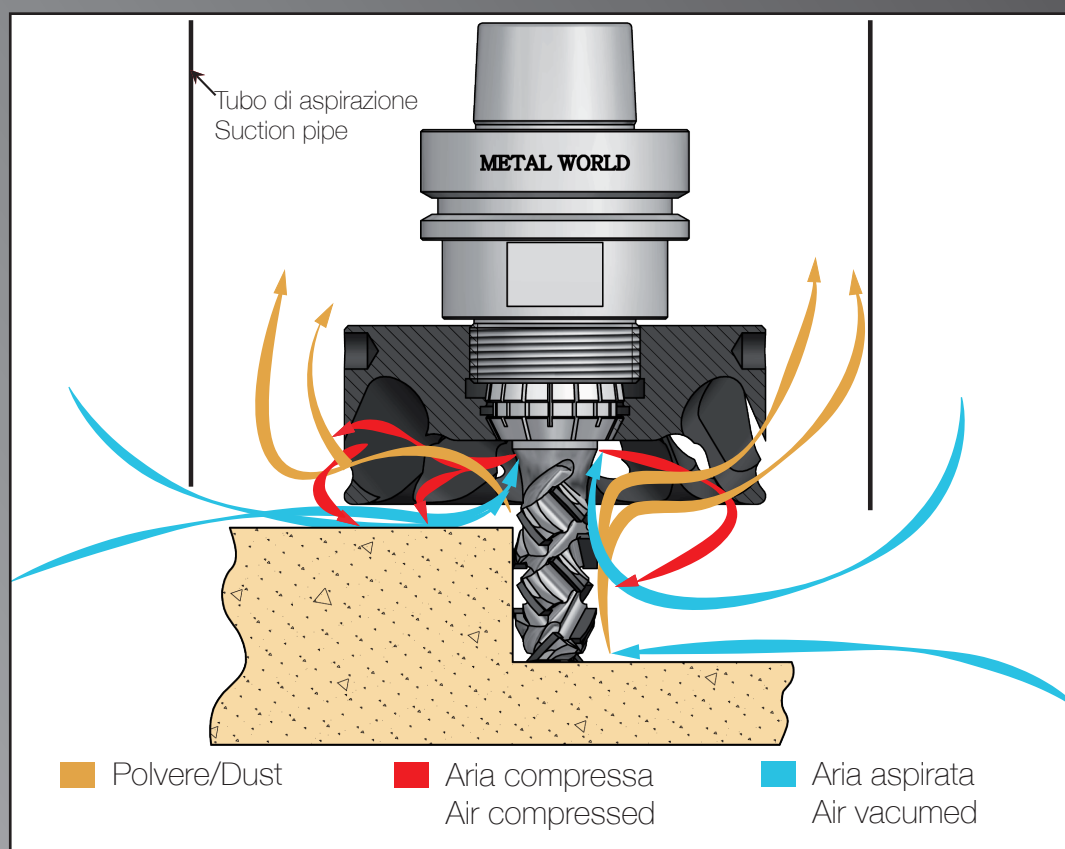

- With **TURBO SYSTEM** you can use various milling tools.
- The thick ceramic coat gives to **TURBO SYSTEM** an anti-corrosion, anti-friction and anti-static surface.
- **TURBO SYSTEM** can be adapted to existing shanks. (ER32, ER40, ORT25),

Turbo System D=80 rpm max 24.000

<i>D tool</i> mm	Machining depth
6	20 mm
8	25 mm
10	25 mm
12	30 mm
16	40 mm
20	45 mm

Turbo System D=100 rpm max 21.000

<i>D utensile/tool</i> mm	Profondità di lavorazione <i>Machining depth</i>
6	25 mm
8	30 mm
10	30 mm
12	35 mm
16	45 mm
20	50 mm
